Herd

THE ELECTRIFYING “O”

I-92-O FOR ALL YOUR ORCHARD NEEDS

The model I-92 Orchard, side mounted standard with front chute #822, spout #827, and 808A width control kit is ideal for spreading granular insecticides, mouse bait or herbicides around trees and under link fences, orchards and vineyards or where weed control is needed and where side-pattern is desired. The smaller I-44 can be identically equipped.

These units are perfectly suited for spreading granular herbicides for grass or weed control around airports, along highways, on ditch banks and anyplace you wish to control weeds or grass. HERD's easy on-and-off control makes quick work of 'spot' weed control in highway plantings and nurseries. May be used on boats or pickups for side spreading. Some granular chemicals, as CASORON® and the like, may be spread in winter ahead of busy spring work. 2.85 bushels or 184 lbs. capacity. I-44 capacity 1.4 bushels or 88 lbs.

808A Width Control Kit

822 Front Chute Kit

827 Spout Kit
